AS Meridian Trade Bank

(AS SMP Bank until 6 May 2014)

Bank separate and Group consolidated financial statements for the year ended 31 December 2014

CONTENTS

MANAGEMENT REPORT

Dear customers, partners and shareholders,

It is with great satisfaction that the Board of AS Meridian Trade Bank announces that the year 2014 has been completed successfully.

During the reporting period the Bank and the Group consistently proceeded on the path of organic business growth and implemented the objectives it had set in its development strategy in line with the present situation in economy and the financial market. Customer loyalty and the conformity of the range of services with the customer's needs is one of the key priorities for the Bank and the Group; therefore, the range of financial services is being constantly extended to meet the demand. Among the innovations implemented during the reporting period, particular attention deserves a number of technology-based services introduced. For example, customers have access to a service of paying electronic invoices on a regular basis, an option to pay national and municipal taxes, purchase various licenses etc. through the Internet Bank.

The Bank's payment card services became more beneficial to the customers as the Bank obtained the right to issue and service payments using VISA payment cards, which will enable to significantly increase the number of payment cards issued by the Bank and turnover.

The Lithuanian branch of the Bank has taken all the steps required in relation to the accession of Lithuania to the euro zone and has effectively transferred to the euro to support further development of business activities.

The Bank optimised the network of its customer service centres by closing certain centres for economic reasons and opening some new centres to increase availability of the Bank's services, particularly in locations from which other commercial banks of Latvia withdrew. During the reporting period, the Bank was impacted by several external conditions resulting both from the geopolitical crisis in Ukraine and its impact on the financial market and economy of the region as a whole.

Upon making a decision to withdraw from the Latvian market, the previous majority shareholder OJCS SMP Bank (Russian Federation) alienated all of its shares of the Bank in favour of Latvian residents. As a result of significant changes in the shareholder structure the Bank joined the number of those Latvian banks that are represented by resident capital. In the present geopolitical circumstances these changes will enable the Bank to expand its international presence in a more dynamic and easier fashion and establish relationships with new partners and counteragents. It is a notable benefit given that international payment services are critical for the Bank's operations and the availability and geographic coverage of these services significantly improves the competitive capacity of the Bank and the Group.

The work performed during the reporting period gives assurance regarding the Bank's and the Group's stability and its ability to operate in various, including non-standard, situations presented by rapidly changing external conditions. It is a significant aspect in light of the present geopolitical situation and its impact on the international financial market that undergoes notable and often hard to predict changes. On behalf of the Bank and the Group, I would like to confirm that the Bank and the Group is and will continue to be a trustworthy and safe partner for its customers as we are certain that professional work, mutual respect and loyalty is the way to overcome any obstacles.

I extend gratitude to the Bank's and Group's customers for their loyalty and to the Bank's and Group's staff for their contribution to the development of the Bank and the Group.

On behalf of the Management of the Bank:

Yours sincerely,

Svetlana Dzene
Chairperson of the Board
19 March 2015

INFORMATION ON THE BANK'S MANAGEMENT

Council members as of the date of signing these financial statements

Name, Surname	Position	Date of Appointment
Ilze Pudiste	Chairperson of the Council	7 May 2014
Goča Tutberidze	Member of the Council	7 May 2014
Andris Dzenis	Member of the Council	12 November 2006

During 2014, Irina Cibuļonoka resigned from the Board, Jekaterina Meinharde was appointed to the Board, and Ilze Pudiste and Natālija Prohorova resigned from the Board and were appointed to the Council.

STATEMENT OF MANAGEMENT RESPONSIBILITY

The management of AS Meridian Trade Bank (hereinafter – Bank) is responsible for the preparation of the Bank's separate financial statements and the consolidated financial statements of the Bank and its subsidiary AS MTB Finance (hereinafter – the Group).

The financial statements on pages 8 to 68 are prepared based on source documents and present fairly the financial position of the Bank and the Group as at 31 December 2014 and the results of its operations, and cash flows for the year ended 31 December 2014.

The Consolidated and the Bank's financial statements are prepared in accordance with the International Financial Reporting Standards, as adopted by the European Union. Appropriate accounting policies have been applied on a consistent basis. In the preparation of the financial statements the Management has made prudent and reasonable judgements and estimates.

The management of AS Meridian Trade Bank are responsible for the maintenance of a proper accounting system, safeguarding the Group's and Bank's assets, and prevention and detection of fraud and other irregularities in the Group and Bank. The Management is also responsible for operating the Bank in compliance with the Law on Credit Institutions, regulations of the Finance and Capital Markets Commission and other legislation of the Republic of Latvia applicable institutions.

On behalf of the Supervisory Council and Management Board:

Ilze Pudiste
Chairperson of the Council

Svetlana Dzene

Independent Auditors' Report

To the shareholders of AS Meridian Trade Bank

Report on the Separate and Consolidated Financial Statements

We have audited the accompanying separate financial statements of AS Meridian Trade Bank ("the Bank"), which comprise the separate statement of financial position as at 31 December 2014, the separate statements of profit and loss and other comprehensive income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes, as set out on pages 8 to 68.
We have also audited the accompanying consolidated financial statements of AS Meridian Trade Bank and its subsidiary ("the Group"), which comprise the consolidated statement of financial position as at 31 December 2014, the consolidated statements of profit and loss and other comprehensive income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes, as set out on pages 8 to 68.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these separate and consolidated financial statements in accordance with International Financial Reporting Standards as adopted by the European Union and for such internal controls as management determines are necessary to enable the preparation of these financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these separate and consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with relevant ethical requirements and plan and perform the audit to obtain reasonable assurance whether these separate and consolidated financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the separate and consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of these financial statements, whether due to fraud or error. In making those risk assessments, we consider internal controls relevant to the Bank's and Group's preparation and fair presentation of these separate and consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's and Group's internal controls. An audit also includes evaluating the appropriateness of accounting principles used and the reasonableness of accounting estimates made by Bank's and Group's management, as well as evaluating the overall presentation of the separate and consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion, the separate financial statements give a true and fair view of the financial position of the AS Meridian Trade Bank as at 31 December 2014, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union.

In our opinion, the consolidated financial statements give a true and fair view of the consolidated financial position of the AS Meridian Trade Bank and its subsidiary as at 31 December 2014, and of the consolidated financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the EU.

Report on Other Legal and Regulatory Requirements

In addition, our responsibility is to assess whether the accounting information included in the Consolidated Management Report, as set out on page 3, the preparation of which is the responsibility of management, is consistent with the consolidated financial statements. Our work with respect to the Consolidated Management Report was limited to the aforementioned scope and did not include a review of any information other than drawn from the consolidated financial statements of the Group. In our opinion, the Consolidated Management Report is consistent with the consolidated financial statements.

NOTES TO THE BANK SEPARATE AND GROUP CONSOLIDATED FINANCIAL STATEMENTS

1 GENERAL INFORMATION

Information on the Bank

AS Meridian Trade Bank (until 6 May 2014 AS SMP Bank – hereinafter the Bank) was incorporated in the Republic of Latvia as a joint stock company "Multibanka" in 1994, in Riga and is licensed as a bank offering a wide range of financial services to enterprises and individuals. The legal address of the Bank is Elizabetes iela 57, Riga, Latvia. The Bank has a branch in Liepaja and 16 cash offices in Riga, 3 cash offices in Daugavpils, 2 cash offices in Ventspils and cash offices in Olaine, Jelgava, Sigulda, Lubana, Saulkrasti and Jurmala. The Bank has a foreign branch in Vilnius (Lithuania) with local cash offices in Vilnius, Klaipeda, Siauliai and Kaunas and a representative office in Moscow, Russian Federation.

These financial statements include the Group consolidated and Bank separate financial statements. The consolidated financial statements for year ended 31 December 2014 include the financial statements of the Bank and its subsidiary AS MTB Finance (hereinafter "the Group"). The legal address of the AS MTB Finance is Elizabetes iela 57, Riga, Latvia. AS MTB Finance manages real estate portfolio and offers leasing services.

Legislation regulating the Bank's operations

The Bank's operations are governed by the laws of the Republic of Latvia "On Credit Institutions", "Commercial Law", and other laws and regulations issued by the Financial and Capital Market Commission (the FCMC). The above regulations govern capital adequacy, minimum equity, liquidity, foreign exchange positions, risk transaction restrictions with respect to one counterparty, group of related customers and related parties of the Bank, as well as other applicable requirements.

2 BASIS OF PREPARATION

Statement of Compliance

The Group consolidated financial statements and the Bank separate financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union, and regulations of the Financial and Capital Market Commission in force as at 31 December 2014.

The Group consolidated financial statements and the Bank separate financial statements were approved for issue by the Board and the Council on 20 March 2015. The shareholders have the power to reject the Group consolidated and the Bank separate financial statements prepared and issued by management and the right to request that new financial statements be issued.

Basis of measurement

The financial statements are prepared on the historical cost basis except for the following:

- financial assets and liabilities at fair value through profit or loss are stated at fair value (including financial assets held for trading);
- availiable-for-sale assests are stated at fair value.

Functional and Presentation Currency

On 1 January 2014 the Republic of Latvia joined the euro-zone and the Latvian Lat was replaced by the euro. As a result, the Group and the Bank converted its financial accounting to euros as from 1 January 2014 and the financial statements for subsequent years will be prepared and presented in euros. Prior period comparative information was translated into euros using the official exchange rate of LVL 0.702804 to EUR 1.

The financial statements are presented in thousands of euros (EUR'000), unless stated otherwise. Euro is the functional currency of the Bank and the Group.

3 PRINCIPAL ACCOUNTING POLICIES

The following significant accounting policies have been applied in the preparation of the consolidated financial statements. The accounting policies have been consistently applied, except for the changes in accounting policies described in Note 3.

Basis of consolidation

Subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from is involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

The investment in AS MTB Finance, in which the Bank holds a 100% interest and voting rights, is accounted for in the Bank's separate financial statements at cost less impairment.

Intra-group transactions, balances and unrealized profits arising from intra-group transactions are eliminated in the course of consolidation. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

Loss of control

When the Group loses control over a subsidiary, it derecognises the assets and liabilities of the subsidiary, and any related NCI and other components of equity. Any resulting gain or loss is recognised in profit or loss. Any interest retained in the former subsidiary is measured at fair value when control is lost.

Currency translation

Foreign exchange transactions are translated into the respective functional currency at the reference exchange rate published by the European Central Bank on the date of the respective transaction.

Monetary assets and liabilities denominated in foreign currencies and carried at historical cost are retranslated into the functional currency at the spot exchange rate at the transaction date. The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the period, adjusted for effective interest and payments during the period, and the amortised cost in foreign currency translated at the exchange rate at the end of the period.

Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value in foreign currency are retranslated into the functional currency at the spot exchange rate at the date that the fair value was determined. Foreign currency differences arising on retranslation are recognized in the profit and loss statement except for the differences arising on the retranslation of available-for-sale equity instruments or a financial liability designated as a hedging instrument in a hedge of the net investment in a foreign operation or in a qualifying cash flow hedge, which are recognized in other comprehensive income. Non-monetary assets and liabilities denominated in foreign currencies that are measured at cost are translated into the functional currency at the spot exchange rate at the date of acquisition.

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated into EUR at exchange rates set by the European Central Bank at the reporting date. The income and expenses of foreign operations are translated into the functional currency at the exchange rates of transaction dates.

Foreign currency differences are recognized in other comprehensive income and accumulated in the translation reserve, except to the extent that the translation difference is allocated to non-controlling interest.

Foreign exchange gains or losses arising from a monetary item receivable from or payable to a foreign operation, the settlement of which is neither planned nor likely to occur in the foreseeable future and which in substance is considered to form part of the net investment in the foreign operation, are recognized in other comprehensive income and accumulated in the translation reserve.

The exchange rates for the most significant currencies as set by the European Central Bank at reporting date are as follows:

Currency	Reporting date	
	31.12.2014	**31.12.2013**
USD	1.2141	1.3791
LTL	3.4528	3.4528
RUB	72.3370	45.3246

Financial instruments

Classification

Financial instruments are classified into the following categories:

Financial assets and liabilities at fair value through profit or loss are financial assets or liabilities that are acquired or incurred principally for the purpose of selling or repurchasing in the near term; or that are part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking; or that are a derivative (except for a derivative that is a designated and effective hedging instrument); or that are upon initial recognition designated by the entity as assets or liabilities at fair value through profit or loss.

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity that the Group or the Bank have the positive intention and ability to hold to maturity, and which are not designated at fair value through profit or loss, or available for sale, or loans and receivables.

Available-for-sale instruments are those financial assets that are designated as available-for-sale or are classified as loans and receivables, held-to-maturity instruments or financial instruments at fair value through profit or loss.

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than (a) those that the Group or the Bank intends to sell immediately or in the short-term, (b) those that the Group or the Bank designates upon initial recognition as financial assets at fair value through profit or loss or as available for sale; or (c) those for which the holder may not recover substantially all of its initial investments, other than because of credit deterioration. Loans and receivables include amounts due from credit institutions on term, loans and receivables from customers and other financial assets which comply with these classification criteria.

Liabilities carried at amortised cost include deposits and balances from banks and current accounts and deposits from customers, subordinated liabilities and other financial liabilities.

Financial liabilities carried at amortized cost are initially measured at fair value less directly attributable transaction costs and are subsequently remeasured to amortized cost using the effective interest rate.

Subordinated deposits have a fixed term of at least five years from the date of placement and they are repayable before maturity only in the event of termination of the Bank's operations or the Bank's bankruptcy and such deposits rank before shareholders' claims. Subordinated debt securities are repayable before maturity only in the event of termination of the Bank's operations or the Bank's bankruptcy and such deposits rank before shareholders' claims.

Recognition

The Group and the Bank initially recognises loans and receivables, deposits and debt securities issued on the date at which they are originated. All other financial assets and liabilities are recognised in the statement of financial position on the trade date when the Group or the Bank becomes a party to the contractual provisions of the instrument.

Measurement

A financial asset or liability is initially measured at fair value plus, in the case of a financial asset or liability other than designed at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or liability.

Subsequent to initial recognition, financial assets are measured at their fair values, without any deduction for transaction costs that may be incurred on sale or other disposal, except for:

- held-to-maturity investments and loans and receivables that are measured at amortized cost using the effective interest method; and
- investments in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured are measured at cost.
- a gain or loss on an available-for-sale financial asset is recognized in other comprehensive income (except for impairment losses and foreign exchange gains and losses on debt financial instruments) until the asset is derecognized, at which time the cumulative gain or loss previously recognised in equity is recognized in the profit or loss. Interest in relation to an available-for-sale financial asset is recognized as earned in the profit or loss calculated using the effective interest method.

NOTES TO THE BANK SEPARATE AND GROUP CONSOLIDATED FINANCIAL STATEMENTS

All financial liabilities, other than those designated at fair value through profit or loss and financial liabilities that arise when a transfer of a financial asset carried at fair value does not qualify for derecognition, are measured at amortised cost. Amortized cost is calculated using the effective interest rate method. Premiums and discounts, including initial transaction costs, are included in the carrying amount of the related instrument and amortised based on the effective interest rate of the instrument. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability. When calculating the effective interest rate, the Group and Bank estimates future cash flows considering all contractual terms of the financial instrument but not future credit losses.

Gains and losses on subsequent measurement

A gain or loss arising from a change in the fair value of a financial asset or liability is recognised as follows:

- a gain or loss on a financial instrument classified as designed at fair value through profit or loss is recognised in the statement of profit or loss;
- for financial assets and liabilities carried at amortised cost, a gain or loss is recognised in the statement of profit or loss when the financial asset or liability is derecognised or impaired.

Derecognition

A financial asset is derecognized when the contractual rights to the cash flows from the financial asset expire or when the Group and the Bank transfer substantially all of the risks and rewards of ownership of the financial asset. Any rights or obligations created or retained in the transfer are recognised separately as assets or liabilities. A financial liability is derecognised when it is extinguished.

The Group and Bank also derecognize certain assets when they write off balances pertaining to the assets deemed to be uncollectible.

Repurchase and reverse repurchase agreements

Securities sold under sale and repurchase ("repo") agreements are accounted for as secured financing transactions, with the securities retained in the balance sheet and the counterparty liability included in amounts payable under repo transactions. The difference between the sale and repurchase price represents the interest expense and is recognised in the statement of comprehensive income over the term of the repo agreement using the effective interest rate method.

Securities purchased under agreements to resell ("reverse repo") are recorded as amounts receivable under "reverse repo" transactions. The differences between the purchase and resale prices are treated as interest income and accrued over the term of the "reverse repo" agreement using the effective interest method.

If assets are purchased under agreement to resell are sold to third parties, the obligation to return securities is recorded as a trading liability and measured at fair value.

Derivatives

Derivative financial instruments including foreign exchange contracts, currency and interest rate swaps and other derivative financial instruments are initially recognized in the statement of financial position at their fair value. Attributable transaction costs are recognised in the profit and loss statement of the relevant period. Fair values are obtained from quoted market prices or discounted cash flow models as appropriate. OTC derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

The Group and the Bank do not use hedge accounting.

Offsetting

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

Property and equipment

Items of property and equipment are measured at cost less accumulated depreciation and accumulated impairment losses.

Where an item of property and equipment comprises major components having different useful lives, they are accounted for as separate items of property, plant and equipment. Cost includes expenses that are directly attributable to the acquisition of the asset.

Depreciation is charged to the profit and loss statement on a straight-line basis over the estimated useful lives of the individual assets. Depreciation commences on the date when the asset becomes available for use or, in respect of internally constructed assets, from the time an asset is completed and ready for use. Depreciation methods, useful lives and residual values are reviewed annually. The annual depreciation rates are as follows:

Buildings	5%
Furniture and cars	20%
Computers	35%
Other fixed assets	20%

Intangible assets

Intangible assets acquired by the Group or the Bank are stated at cost less accumulated amortisation and impairment losses.

Software licences are capitalised on the basis of the costs incurred to acquire and customise the specific software. Depreciation is charged to the profit and loss statement on a straight-line basis over the estimated useful lives of the individual assets. The estimated useful lives are 5 to 7 years.

Investment property

Investment property is property held either to earn rental income or for capital appreciation or for both, but not for sale in the ordinary course of business or for administrative purposes. Investment property is carried at cost less accumulated depreciation and impairment. Depreciation is charged to the profit and loss statement on a straight-line basis. The annual depreciation rate for all investment property, except land, is 5%. No depreciation is calculated for land.

Repossessed assets

As part of the normal course of business the Group and Bank occasionally take possession of property that originally was pledged as security for a loan. When the Group and Bank acquire (i.e. gain a full title to) a property in this way, the property's classification follows the nature of its intended use by the Group and Bank. When the Group and Bank is uncertain of its intentions with respect to property that it has repossessed, those properties are classified as investment property. Other types of collateral (repossessed finance lease objects) are classified as other assets and are recognized at cost less impairment.

Recognition of income and expenses

All significant categories of income and expenses are recognised on an accrual basis.

Interest income is recognized as it accrues in the profit and loss statement using the effective interest method. Interest income and expense include the amortisation of any discount or premium or other differences between the initial carrying amount of an interest bearing instrument and its amount at maturity calculated on an effective interest rate basis.

Loan origination fees and other fees including the related direct costs that are considered an integral part of the total loan profitability are deferred and amortised to the interest income over the estimated life of the financial instrument using the effective interest rate method.

Other fees, commissions and other income and expense items are recognised when the corresponding service has been provided.

Fair value measurement principles

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal, or in its absence, the most advantageous market to which the Group has access at that date. The fair value of a liability reflects its non-performance risk.

A number of the Group's accounting policies and disclosures require the determination of fair value for both financial and non-financial assets and liabilities, which are accounted for at fair value or information about its fair value has to be presented in the financial statements.

The Group and the Bank have an established control framework with respect to the measurement of fair values. This includes a valuation team that has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values, and reports directly to the CFO.

NOTES TO THE BANK SEPARATE AND GROUP CONSOLIDATED FINANCIAL STATEMENTS

Specific controls include:

- Verification of observable pricing;
- Re-performance of model valuations;
- A review and approval process for new models against observed market transactions;
- Analysis and investigation of significant daily valuation movements;
- Review of significant unobservable inputs, valuation adjustments and significant changes to the fair value measurement of Level 3 instruments compared to previous month.

The methods described below have been used for the determination of fair values.

The best evidence of the fair value of a financial instrument at initial recognition is the transaction price, i.e., the fair value of the consideration given or received, unless the fair value of that instrument is evidenced by comparison with other observable current market transactions with the same instrument (i.e., without modification or repackaging) or based on a valuation technique whose variables include only data from observable markets. When transaction price provides the best evidence of fair value at initial recognition, the financial instrument is initially measured at the transaction price and any difference between this price and the value initially obtained from a valuation model is subsequently recognized in the profit and loss statement depending on the individual facts and circumstances of the transaction but not later than when the valuation is supported wholly by observable market data or the transaction is closed out.

When available, the Group and Bank measure the fair value of an instrument using quoted prices in an active market for that instrument. A market is regarded active if quoted prices are readily and regularly available and represent actual and regularly occurring market transactions on an arm's length basis.

If a market for a financial instrument is not active, the fair value is established by the Group and the Bank using a valuation technique. Valuation techniques include recent arm's length transactions between knowledgeable, willing parties (if available), reference to the current fair value of other instruments that are substantially the same, discounted cash flow analyses and option pricing models. The chosen valuation technique should make maximum use of market inputs, rely as little as possible on estimates specific to the Group and the Bank, incorporate all factors that market participants would consider in setting a price, and be consistent with accepted economic methodologies for pricing financial instruments. Inputs to valuation techniques reasonably represent market expectations and measures of the risk-return factors inherent in the financial instrument. The Bank and the Group calibrate valuation techniques and test them for validity using prices from observable current market transactions in the same instrument or based on other available observable market data.

Where third-party information, such as broker quotes or pricing services, are used to measure fair value, the Group and the Bank assesses and documents the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of IFRS as adopted by EU. This includes:

- Verifying that equity broker or pricing service is approved by the Group and the Bank for use in pricing the relevant type of financial instrument;
- Understanding how the fair value has been arrived at and the extent to which it represents actual market transactions;
- When prices for similar instruments are used to measure fair value, how these prices have been adjusted to reflect the characteristics of the instrument subject to measurement.

In determining the fair value of assets or liabilities the Group and the Bank use observable market data to the extent possible. The fair value is classified into various levels of fair value hierarchy based on the inputs used in valuation methods:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability might be categorized in different levels of the fair value hierarchy, the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group and the Bank recognize transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred. The Group and the Bank recognize transfers between levels of the fair value hierarchy as of the end of the reporting period during which the change has occurred. For further analysis of the basis for fair value refer to Note 40.

Impairment losses

Financial assets

At each reporting date the Group and the Bank assess whether there is objective evidence that financial assets other than those designed at fair value through profit or loss are impaired. A financial asset is impaired if objective evidence indicates that a loss event has occurred after the initial recognition of the asset, and that the loss event had a negative effect on the estimated future cash flows of that asset which can be estimated reliably.

Objective evidence that financial assets (including equity securities) are impaired can include default or delinquency by a borrower, restructuring of a loan or advance by the Group and the Bank on terms that the Group and the Bank would not otherwise consider, indications that a borrower or issuer will enter bankruptcy, the disappearance of an active market for a security, or other observable data relating to a group of assets such as adverse changes in the payment status of borrowers or issuers in the group, or economic conditions that correlate with defaults in the group. In addition, for an investment in an equity security, a significant or prolonged decline in its fair value below its cost is objective evidence of impairment.

The Group and Bank consider evidence of impairment for loans and advances and held-to-maturity investment securities at specific asset level. All loans and receivables from customers and held-to-maturity investment securities are assessed for specific impairment.

Impairment losses on assets carried at amortised cost are measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the asset's original effective interest rate. Losses are recognised in profit or loss and reflected in an allowance account against loans and advances. Interest on the impaired asset continues to be recognised through the unwinding of the discount. When a subsequent event causes the amount of impairment loss to decrease, the decrease in impairment loss is reversed through profit or loss.

Impairment losses on available-for-sale investment securities are recognised by transferring the cumulative loss that has been recognised in other comprehensive income to profit or loss. The cumulative loss that is removed from equity and recognised in profit or loss is the difference between the acquisition cost, net of any principal repayment and amortisation, and the current fair value, less any impairment loss previously recognised in statement of comprehensive income. Changes in impairment provisions attributable to time value are reflected as a component of interest income.

If, in a subsequent period, the fair value of an impaired available-for-sale debt security increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss is reversed, with the amount of the reversal recognised in profit or loss. However, any subsequent recovery in the fair value of an impaired available-for-sale equity security is recognised in other comprehensive income.

Non-financial assets

The carrying amounts of the Group's and Bank's non-financial assets, other than deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

An impairment loss is recognised whenever the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. A cash-generating unit is the smallest identifiable asset group that generates cash flows that largely are independent from other assets and groups. Impairment losses are recognized as profit or loss in the profit and loss statement. Impairment losses recognized in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of the other assets in the unit (group of units) on a pro rata basis.

The recoverable amount of an asset or cash generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

In respect of other assets, except goodwill, impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the carrying amount of the asset does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

NOTES TO THE BANK SEPARATE AND GROUP CONSOLIDATED FINANCIAL STATEMENTS

Loan commitments

In the normal course of business, the Group and the Bank enter into credit related commitments comprising irrevocable credit line facilities, letters of credit and guarantees, and provides other forms of credit insurance.

Financial guarantees are contracts that require the Group and the Bank to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument.

A financial guarantee liability is recognized initially at fair value net of associated transaction costs, and is measured subsequently at the higher of the amount initially recognized less cumulative amortization or the amount of provision for losses under the guarantee. Provisions for losses under financial guarantees and other credit related commitments are recognized when losses are considered probable and can be measured reliably.

Financial guarantee liabilities and provisions for other credit related commitments are included within other liabilities.

Taxation

Income tax expense comprises current and deferred tax. Income tax expense is recognised in the profit and loss statement except to the extent that it relates to items recognised directly in equity or in other comprehensive income.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date and any adjustment to tax payable in respect of previous years.

Deferred tax is provided for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for tax basis. Deferred tax is not recognized for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor tax profit, and differences relating to investments in subsidiaries to the extent that they probably will not reverse in the foreseeable future. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

A deferred tax asset is recognised in the statement of financial position only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Cash and cash equivalents

Cash and cash equivalents include notes and coins on hand, unrestricted balances held with the Bank of Latvia and highly liquid financial assets with original maturities of less than three months, which are subject to insignificant risk of changes in their fair value, and are used by the Group and the Bank in the management of its short-term commitments, excluding amounts due to the Bank of Latvia and credit institutions with maturities of less than 3 months.

Leases

Classification

Only risks and rewards incidental to ownership of the leased asset during the lease period should be considered in determining the classification of lease. Relevant risks include the possibility of losses from idle capacity or technological obsolescence and from decreases in the value of the asset; relevant rewards may include the gain from the increase in value of the asset or realization of the residual value at the end of the lease. Conversely, risks associated with construction of the asset prior to lease commencement, financing such construction and the costs of providing services using the leased asset, are not incidental to ownership of the leased asset during the lease period and in the Management's view generally should be disregarded in determining the classification of the lease. The classification of a lease is determined at the inception of the lease and is not revised unless the lease agreement is modified.

Finance lease

A finance lease is lease that transfers substantially all the risks and rewards incidental to ownership of an asset. Title may or may not eventually be transferred.

When assets are leased out under finance lease terms, the net investment in finance lease is recognized as a receivable. The net investment in finance lease represents the difference between the gross receivable and the unearned finance income.

Operating lease

An operating lease is a lease other than a finance lease.

Assets leased out under an operating lease are presented within property and equipment in the statement of financial position net of accumulated depreciation. They are depreciated over their expected useful lives on a basis consistent with similar owned Property and equipment.

Provisions

A provision is recognized in the statement of financial position when the Group and the Bank have a legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits that can be reliably estimated will be required to settle the obligation.

If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

A provision for restructuring is recognised when the Group and the Bank has approved a detailed and formal restructuring plan, and the restructuring either has commenced or has been announced publicly. Future operating costs are not provided for.

Dividends

The Group and Bank receive dividends from the equity instruments that are recorded to income when the right to receive payment is established.

Proposed dividends are recognized in the financial statements only when approved by the shareholders.

Employee benefits

Short term employee benefits, including salaries and social security contributions, bonuses and vacation benefits are included in net operating expenses on an accrual basis. The Group and the Bank pay fixed security contributions to the State Social Fund on behalf of its employees during the employment period in accordance with local legal requirements and the Group and Bank will have no obligations to pay further contributions relating to employee services in respect to pension of retired employees.

Adoption of new and/or amended IFRSs and IFRIC interpretations

(a) Changes in accounting policies

Except for the changes below, the Group and the Bank have consistently applied the accounting policies set out in Note 3 to all periods presented in these consolidated and separate financial statements.

The Group and the Bank have adopted the following new standards and amendments to standards, including any consequential amendments to other standards, with a date of initial application of 1 January 2014.

(i) IFRS 10 Consolidated Financial Statements (2011)

As a result of IFRS 10 (2011), the Group has changed its accounting policy for determining whether it has control over and consequently whether it consolidates its investees. IFRS 10 (2011) introduces a new control model that focuses on whether the Group has power over an investee, exposure or rights to variable returns from its involvement with the investee and ability to use its power to affect those returns.

In accordance with the transitional provisions of IFRS 10 (2011), the Group reassessed the control conclusion for its investees at 1 January 2014. The Group concluded that there are no changes in control assessment as a consequence of new rules introduced by IFRS 10 (2011).

(ii) IFRS 11 Joint Arrangements

Under IFRS 11, the structure of the joint arrangement, although still an important consideration, is no longer the main factor in determining the type of joint arrangement and therefore the subsequent accounting.

- The Group's interest is a joint operation, which is an arrangement in which the parties have rights to the assets and obligations for the liabilities, will be accounted for on the basis of the Group's interest in those assets and liabilities.
- The Group's interest in a joint venture, which is an arrangement in which the parties have rights to the net assets, will be equity-accounted.

The Group is not a party to any joint arrangements.

(iii) IFRS 12: Disclosure of Interests in Other Entities

IFRS 12 brings together into a single standard all the disclosure requirements about an entity's interest in subsidiaries, joint arrangements, associates and unconsolidated structured entities.

As a result of IFRS 12, the Group and Bank has expanded its disclosures about its interests in subsidiaries (Note 29).

(iv) Other amendments to standards

The following amendments to standards with effective date of 1 January 2014 did not have any impact on these consolidated and separate financial statements:

- Amendments to IAS 32 on Offsetting Financial Assets and Financial Liabilities
- Amendments to IAS 36 on Recoverable Amount Disclosures for Non-Financial Assets
- Amendments to IAS 39 on Novation of Derivatives and Continuation of Hedge Accounting

(b) New standards and interpretations not yet adopted

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 January 2014, and have not been applied in preparing these consolidated and separate financial statements. Those which may be relevant to the Group or the Bank are set out below. The Group and the Bank do not plan to adopt these standards early.

(i) IAS 19 – Defined Benefit Plans: Employee Contributions (effective for annual periods beginning on or after 1 February 2015)

The amendments are relevant only to defined benefit plans that involve contributions from employees or third parties meeting certain criteria. When these criteria are met, a company is permitted (but not required) to recognise them as a reduction of the service cost in the period in which the related service is rendered.

The Group and Bank does not expect the amendment to have any impact on the consolidated and Banks separate financial statements since they does not have any defined benefit plans that involve contributions from employees or third parties.

(ii) IFRIC 21 Levies (effective for annual periods beginning on or after 17 June 2014)

The Interpretation provides guidance as to the identification of the obligating event giving rise to a liability, and to the timing of recognising a liability to pay a levy imposed by government. In accordance with the Interpretation, the obligating event is the activity that triggers the payment of that levy, as identified in the relevant legislation and as a consequence, the liability for paying the levy is recognised when this event occurs. The liability to pay a levy is recognised progressively if the obligating event occurs over a period of time. If the obligating event is the reaching of a minimum activity threshold, the corresponding liability is recognised when that minimum activity threshold is reached. The Interpretation sets out that and entity cannot have a constructive obligation to pay a levy that will be triggered by operating in a future period as a result of the entity being economically compelled to continue to operate in that future period.

It is expected that the Interpretation, when initially applied, will not have a material impact on the consolidated and separate financial statements, since it does not result in a change in the entity's accounting policy regarding levies imposed by governments.

(iii) Annual Improvements to IFRSs

The improvements introduce eleven amendments to nine standards and consequential amendments to other standards and interpretations. Most of these amendments are applicable to annual periods beginning on or after 1 February 2015, with earlier adoption permitted. Another four amendments to four standards are applicable to annual periods beginning on or after 1 January 2015, with earlier adoption permitted.

None of these amendments are expected to have a significant impact on the consolidated and separate financial statements of the Group and Bank.

4 MANAGEMENT OF RISKS

Management of the Group and Bank has developed a system for the identification, supervision and management of the Group's and the Bank's main financial risks. The Bank's Management has approved this risk management system. This system is being constantly updated to take into account market conditions and the development of the Group's and Bank's main operations. The following policies have been approved in order to achieve the Group's and the Bank's objectives related to capital adequacy, credit risk, operational risk management and anti-money laundering and terrorism financing:

1. Liquidity risk management policy;
2. Credit policy;
3. Risk transactions and risk control policy for large transactions;
4. Currency risk management policy;
5. Country risk management policy;
6. Interest rate risk management policy;
7. Policy on the prevention of laundering of proceeds derived from criminal activity and terrorism financing;
8. Operational compliance risk management policy;
9. Capital adequacy assessment policy;
10. Operational risk management policy.

Liquidity risk

Liquidity risk is defined as the risk that the Bank and the Group may be unable to sustain its current and future cash flows and secure borrowings to prevent threats to the Bank's daily operations or overall financial position of the Bank (liquidity risk of financing) and risk that the Bank and the Group may be unable to sell its financial assets in the desired term without material losses due to a market collapse or insufficient market depth (market liquidity risk).

The Group and Bank have maintained adequate amounts of liquid assets to ensure compliance with liquidity ratio required by the normative acts of the Republic of Latvia of 30% against the Group and Bank's current liabilities as at 31 December 2013 and 31 December 2012. According to the requirement set by the Financial and Capital Market Commission, during 2014 the Bank was required to maintain an individual liquidity ratio of 50%. The Group and Bank have approved internal limits for liquidity net position of the term structures of assets and liabilities in all currencies, EUR and USD. Internal limits for liquidity are used for risk analysis and control of liquidity and desirable structure of financing sources. An early warning system was developed in order to help identify exposure of the Bank's and the Group's liquidity position and necessity to attract additional sources. On the basis of data from early notification indices the Bank and the Group identify adverse trends impacting liquidity and analyse these trends and assess whether any hedging measures are required for liquidity risk. The Bank's Treasure Division organises and manages the process of resource management in order to ensure solvency, liquidity and profitability of the Bank. The Risk Management Department of the Bank evaluates and plans the term structure of assets and liabilities on a regular basis, and monitors compliance with the required liquidity norms and internal limits defined by the Group and the Bank. Liquidity stress testing is performed using 7 scenarios. Scenarios include both internal and external factors. Stress testing is performed to the following stress levels: internal and typical to the Bank unfavourable events, changes of general market conditions, banking crisis and general market crisis at the same time. The impact of various shock scenarios on the regulating liquidity ratio and the Bank's income is analysed. The Board of the Bank and the Group develops and the Council approves a Business Continuity Plan for liquidity crises that specifies: preventive measures for the reduction of the likelihood of liquidity crisis, methods of timely identification of liquidity crisis and risk assessment, measures that have to be taken immediately in order to overcome liquidity crisis. The plan is tested on a regular basis. For maturity analysis of assets and liabilities refer to Note 37.

Credit risk

Credit risk is the risk that:

- a counterparty, or obligor, fails to meet contractual obligations to the Group and Bank;
- the value of collateral will not cover the claim; and
- financial loss of the Group and the Bank occurring as a result of default by a borrower or counterparty on their obligation to the Group or the Bank.

To minimize credit risk, the Group and the Bank have developed policies for the management of credit exposures (both for the statement of financial position and estimated and possible liability exposures), including guidelines to limit portfolio concentration. Credit Committee has been established and is rigorously monitoring the Group's and the Bank's credit risk. The Group's and Bank's liquidity policy is reviewed and approved by the Management Board.

The Group's and Bank's credit policy establishes:

- Procedures for processing loan applications;
- Methodology for the credit assessment of borrowers;
- Methodology for the credit assessment of counterparties, issuers and insurance companies;
- Methodology for the evaluation of collateral;
- Documentation rules for the lending process;
- Procedures for the ongoing monitoring of loans and other credit exposures.

Measurement of credit risks includes:

- risk assessment to make a decision on granting a loan;
- monitoring and management of credit risk;
- profit adjustment representing risk;
- risk analysis of credit portfolios;
- capital adequacy and capital distribution assessment;
- regular stress testing credit risk by the use of different scenarios.

The Group and Bank continuously monitor the performance of individual credit exposures and regularly reassesses the creditworthiness of its customers. The review is based on the customer's most recent financial statements and other information submitted by the borrower, or otherwise obtained by the Bank. The current market value of collateral is regularly determined by either independent appraisal companies or the Bank's specialists, and in the event of negative movements in market prices the borrower is usually requested to put up additional security.

The Group's and the Bank's maximum exposure to financial position credit risk is generally reflected in the carrying amounts of financial assets on the statement of financial position. The impact of possible netting of assets and liabilities to reduce potential credit exposure is not significant.

The Group and Bank monitor concentrations of credit risk by industry/sector and by geographic location. For the analysis of concentration of credit risk in respect of loans and advances to customers refer to Note 11 "Loans" and Note 39 "Maximum credit risk".

In order to meet the requirements defined in the policy of risk transactions and large risk transactions, the Group and the Bank perform an assessment and control of risks associated with all assets and liabilities, including contingent liabilities of the Group and Bank on a regular basis. Limits are regarded as the main tool for the control of risk transactions. The Group and the Bank ensures compliance with the required capital adequacy ratio – the proportion of weighted values of the Group and Bank's equity, assets, liabilities and off-balance items, which as at 31 December 2014 and 2013 was 15% and 14%, respectively.

Capital management

The Credit Institution Law and regulations developed by the Financial and Capital Market Commission for application of the norms of this law, require Latvian banks to maintain a capital adequacy ratio of 8%, i.e., Bank's capital ratio against the risk weighted assets and contingent liabilities and the sum of notional risk weighted assets and contingent liabilities. The sum of notional risk weighted assets and contingent liabilities are determined as the sum of capital requirements of risks multiplied by 12.5. According to the rules of the Financial and Capital Market Commission, the Bank is required to maintain an individual capital adequacy ratio of 10.8% starting 1 October 2014 and an individual capital adequacy ratio of 11.6% starting 1 November 2014.

The assets have been weighted in accordance with pre-defined risk grades, determining risks in accordance with the amount of capital, necessary to maintain these assets. Off-balance sheet loan liabilities are weighted in accordance with lending risk adjustment grades and risk grades defined for liabilities of partners. The following risk grades are applied: 0%, 20%, 35%, 50%, 100%, 150%.

The Bank's objectives when managing capital, which complies with the term "equity" in the statement of financial position, are:

- To comply with the capital regulatory requirements.
- To safeguard the Bank's ability to continue as a going concern so that it can continue to provide returns for shareholders.
- To maintain the strong capital base to support the development of its business.

NOTES TO THE BANK SEPARATE AND GROUP CONSOLIDATED FINANCIAL STATEMENTS

Capital adequacy and the use of regulatory capital are monitored by the Bank's management on a regular basis, employing techniques based on the guidelines developed by the Basel Committee and the European Union directives, as implemented by the Financial and Capital Market Commission. The required information is filed with the Financial and Capital Market Commission on a monthly basis.

The guidelines of the Financial and Capital Market Commission for calculation of capital adequacy basically agree to the recommendations under the Basel Capital Accord and amendments thereto. According to the Basel Capital Accord, the capital adequacy ratio should be at least 8%. For the calculation of capital adequacy refer to Note 38.

Currency risk

Currency risk represents the potential losses from revaluation of balance sheet and off-balance-sheet items denominated in foreign currencies due to movements in foreign exchange rates. Gold is regarded as foreign currency. During 2014, the Group and the Bank performed daily controls of compliance with limits defined in Currency risk management policy, for transactions with foreign currency. The Bank and the Group are subject to the Credit Institutions Law which requires that the open position in an individual currency should not exceed 10% of the Bank's capital and the total open foreign currency position should not exceed 20% of the Bank's capital. In accordance with requirements of Currency risk management policy, structural units of the Group and Bank are cooperating with department of financial operations in evaluation of currency risk component of the planned transactions and elaboration of hedging method for it. For currency analysis refer to Note 36.

Interest rate risk

Interest risk is represented by possible negative influence on the Group and the Bank's income that can result from possible changes of interest rates. The GAP analysis is used for regular measurements of interest rates risk. Assets, liabilities, guarantees and contingent liabilities, subjected to interest rate risk, are divided in accordance with minimum period, left till possible repricing dates of interest rates. The Group and Bank calculate the influence on yearly net interest income, with parallel increase of interest rates for 100 base points. The Bank performed interest rate risk stress testing. In accordance with requirements of Interest rate risk management policy, interest rate risk has to be assessed whenever limits for financial instruments are determined. For the results of sensitivity analysis refer to Note 34.

Country risk

Country risk is represented by possible losses in cases, where a debtor of the Group and Bank, being non-resident, will not be able to meet its liabilities against the Group and Bank, due to political, social or economic circumstances of the country of residency of the debtor. Country risk is managed by the Board of the Bank. Based on analyses of economic, political and social conditions of each particular country, limits are determined for geographic concentration of assets, liabilities and off-balance sheet items, for the purpose of management of country risk. The evaluation provided by international rating agencies is considered when assessing country risk in each separate case. Limitations have been approved for placement of assets in countries graded as non-OECD, as well as for limitations on residual balances of nostro accounts. Limits for partners and transaction types are determined based on evaluation of risks of country and partners. For the purpose of monitoring the compliance with these limits, control over observation of limits is performed on a regular basis. For geographical concentration refer to Note 33.

Anti money laundering and counter terrorism financing

In order to avoid involvement in money-laundering schemes, the Bank and the Group have implemented AML and CTF policies and procedures. AML compliance risks may cause financial losses, arising from legal actions and eventual financial sanctions against the Bank and the Group, as well as from limitations on banking operations, loss of customers or its place on financial markets. The Group and Bank manage their AML compliance risks on regular basis, identifying legal, reputational, operational and concentration risks, as well as planning and performing necessary measures to minimise those risks based on requirements of AML strategy and Customer policy that has been developed and approved by the Group and the Bank. These requirements are based on the adequate identification of a customer and its beneficiary owner and "Know Your Customer" principle of their business, as well as identification of unusual and suspicious transactions, its control and reporting to state authorities according to requirements of applicable legislative acts. AML compliance action plan includes also AML training of staff of structural units of the Group and Bank, involved with servicing of customers and implementation of latest IT technologies and requirements of information security and data integrity principles in daily operations of the Group and Bank.

5 ESTIMATES AND JUDGMENTS

The preparation of financial statements in conformity with IFRS as adopted by the EU requires management to make judgments, estimates and assumption that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Although these estimates are based on management's best knowledge of current events and actions, the actual results ultimately may differ from those estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to the accounting estimates are recognized in the period, in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Key sources of estimation uncertainty:

Impairment of financial instruments (other than loans and receivables)

The signs of impairment are determined based on a comparison of the financial instrument's carrying amount and fair value. Due to downturns in the financial and capital markets, the market price is not always a reliable source for impairment indication. The Group and the Bank uses valuation models based on quoted market prices of similar products.

For the purposes of impairment loss measurement, the Bank's management makes estimates of any expected changes in future cash flows from a specific financial instrument based on an analysis of the financial position of the issuer of the financial instrument.

Allowances for doubtful debts

The specific component of the total allowances for impairment applies to financial assets evaluated individually for impairment and is based upon management's best estimate of the present value of the cash flows that are expected to be received. In estimating these cash flows, management makes judgements about each counterparty's financial situation and the net realisable value of any underlying collateral. Each impaired asset is assessed on its merits, and the workout strategy and estimate of cash flows considered recoverable are reviewed by the Credit Risk function.

Impairment of non-financial assets

The carrying amounts of the Group's non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. The recoverable amount of an asset or cash generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An impairment loss is recognized if the carrying amount of an asset exceeds its estimated recoverable amount.

Deferred tax asset recognition

A deferred tax asset is recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

6 CASH AND DUE FROM THE BANK OF LATVIA

	2014	2014	2013	2013
EUR'000	**Group**	**Bank**	**Group**	**Bank**
Cash	4,849	4,849	3,267	3,267
Balance with the Bank of Latvia (including minimum reserve deposit)	495	495	49,176	49,176
Total	**5,344**	**5,344**	**52,443**	**52,443**

Due from the Bank of Latvia represents the EUR nominated balance on the correspondent account with the Bank of Latvia.

According to the regulations of the European Central Bank, the Bank is required to maintain obligatory reserves with the Bank of Latvia equal to 1% of the closing monthly balances due of overnight deposits, deposits with agreed maturity or period of notice up to 2 years, debt securities issued with maturity up to 2 years, money market paper. For all other liabilities included in the reserve calculation the applicable rate is 0%.

The compulsory reserve is compared to the Bank's average monthly balance on the correspondent account with the Bank of Latvia. The Bank's average cash and correspondent balance should exceed the compulsory reserve requirement.

On 1 January 2014 the Republic of Latvia joined the euro-zone and the Latvian Lat was replaced by the euro, as a result as of 1 January 2014 the obligatory reserve rates are determined by European Central Bank, previously these rates were determined by Bank of Latvia.

As at 31 December 2014 and 31 December 2013 the Bank was in compliance with the above requirements.

As at 31 December 2012	**1,514**	**4,706**	**6,220**
31 December 2013	**2,103**	**5,774**	**7,877**
31 December 2014	**2,203**	**6,474**	**8,677**

Income from lease of investment property in 2014 amounted to EUR 176 thousand (2013: EUR 98 thousand) and relevant maintenance expenses in 2014 amounted to EUR 76 thousand (2013: EUR 95 thousand).

Investment property is recognized at cost less depreciation expenses and impairment costs. Investment property consists of land, residential properties and commercial properties.

The fair value of investment properties as at 31 December 2014 amounted to EUR 11,185 thousand (2013: EUR 8,722 thousand). Valuations were performed using two generally accepted methodologies in order to estimate the fair value of investment properties: income approach using discounted cash flow model and market approach using market comparable method. The fair value measurement for investment property has been categorised as a Level 3 in the fair value hierarchy.

14 OTHER ASSETS

Other shareholders	14,547	6.61	74	0.03
Total	**220,124**	**100**	**220,124**	**100**

The Bank's capital is registered and fully paid. Ordinary shares rank equally with respect to dividends, as may be declared, and entitle all holders to equal voting rights at the shareholders' meeting. All shares rank equal with respect to residual assets. As at 31 December 2014, there were 9 shareholders – 2 legal persons and 7 individuals (2013: 7 – 2 legal persons and 5 individuals).

According to legislation, the Bank re-registered its share capital in euros (EUR) in 2014. The nominal value of one share is EUR 71.10.

Upon privatization of the Bank in accordance with statutory requirements in force as at the date of privatization reserves amounting to EUR 149 thousand were created.

The former shareholder of the bank transferred its owned shares to the Bank without compensation in May 2014. In November 2014 the Bank sold these shares for EUR 4,006 thousand and as at 31 December 2014 these investments are classified as reserve capital.

The use of share premium is defined by applicable Latvian legislation.

29 IVESTMENTS IN SUBSIDIARIES

(a) Investments in subsidiaries (Bank)

	Investment %	
Name of the subsidiary	**2014**	**2013**
MTB Finance AS	100%	49.03%

In line with changes in shareholding of the Bank, ex-shareholders of MTB finance, holding controlling part of the shares, alienated all of their shares of the MTB Finance AS, without compensation, in favour of the Bank. After the transaction, the Bank has 100% control over the subsidiary. As at the date of takeover of share capital, investment value, in accordance with Bank's assessment, was completely decreased, as the subsidiary had negative net assets.

(b) Non-controlling interest in subsidiary

Previously the Bank controlled MTB Finance AS through subsidiaries Board, due to which the subsidiary was included in the consolidation.

30 RELATED PARTY TRANSACTIONS

(a) Control relationships

Related parties are defined as shareholders who have significant influence over the Bank and its subsidiary, members of the Supervisory Board and Board of Management, and other related parties, i.e., key Management personnel, their close relatives and companies in which they have a controlling interest as well as associated companies.

During 2014 and 2013, all related party transactions were performed on an arm's length basis.

The balance of subordinated liabilities to related parties as at 31 December 2014 is EUR 500 thousand (2013: EUR 500 thousand). Refer to Note 17 for more detailed information.

Transactions with AS MTB Finance (Latvia) for the year ended 31 December 2014 are as follows:

EUR'000	2014 Bank	Weighted average rate	2013 Bank	Weighted average rate
Loans to AS MTB Finance	24,548	1.74%	23,623	1.76%
Deposits from AS MTB Finance	2	-	4	-

Funds received from individuals	50	50	9	9
Funds received from corporate customers	12,703	12,703	73,565	73,565
Total	**12,753**	**12,753**	**73,574**	**73,574**

Liabilities under trust management consist of funds of non-resident clients in the total amount of EUR 12 703 thousand and the funds of resident clients in the total amount of EUR 50 thousand.

A fiduciary loan is a transaction whereby the Bank and Group have attracted a fiduciary deposit that has been issued to a borrower specified by those depositors on behalf of the depositors and at the depositor's risk. The property owned by clients is kept under management separately from the property of the Bank and Group and is kept in separate accounts at credit institutions through which the funds are invested. Assets under management often represent a securities portfolio separated from the Bank's and the Group's assets, which is treated as a joint management object with its own structure, liquidity degree, sources of resources, yield and common risk. The Group and Bank is engaged in securities purchase and sales on behalf of their clients. Such securities are not recognized on statement of financial position of the Bank and the Group.

32 CONTINGENT LIABILITIES

At any time the Bank has outstanding commitments to extend credit. These commitments take the form of approved loans, credit card limits and overdraft facilities.

The Bank provides financial guarantees and letters of credit to guarantee the performance of customers to third parties. These agreements have fixed limits and generally extend for a period of up to ten years. The Bank also provides guarantees by acting as settlement agent in securities borrowing and lending transactions

The contractual amounts of commitments are set out in the following table by category. The amounts reflected in the table for commitments assume that amounts are fully advanced. The amounts reflected in the table for guarantees and letters of credit represent the maximum exposure that would be recognised in the statement of comprehensive income if counterparties failed to honour their contracted liabilities to any extent.

	2014	2014	2013	2013

34 INTEREST RATE REPRICING ANALYSIS (CONTINUED)

Sensitivity analyses

The following demonstrates the sensitivity to reasonably possible changes in interest rates of the Bank's statement of comprehensive income. The analysis assumes that all other variables, in particular foreign currency rates, remain constant.

The sensitivity of statement of comprehensive income is the effect of the assumed changes in the interest rates on the net interest income for one year, following the reporting period end date, based on the floating rate non-trading financial assets and financial liabilities held at 31 December 2014 and 31 December 2013.

Sensitivity of the Group's profit and loss to changes in interest rates is not disclosed separately as it does not differ significantly from that of the Bank.

An increase and decrease of interest rates by 100 basis points would result in the following change to the statement of comprehensive income and equity:

	2014		2013	
EUR'000	**Profit or loss**	**Equity**	**Profit or loss**	**Equity**
Interest rate increase	(335)	(335)	(84)	(84)
Interest rate decrease	335	335	84	84

36 CURRENCY ANALYSIS

The Group and Bank actively controls foreign exchange open positions. The Bank operates based on the Law on Credit Institutions stating that the open position in any currency should not exceed 10% of shareholders' equity and that the total open position should not exceed 20% of the shareholders' equity.

The geographical segmentation of the Group's and the Bank's assets, liabilities and contingent liabilities as at 31 December 2014 was as follows:

Group

An analysis of sensitivity of the Group's and Bank's net income for the year and equity to changes in the foreign currency exchange rates based on positions existing as at 31 December 2013 and 2014 and a simplified scenario of a 10% change in USD to EUR exchange rates is as follows:

Group

EUR'000	2014 Net profit	2013 Net profit
10% appreciation of USD against EUR	104	(85)
10% depreciation of USD against EUR	(104)	85

Bank

EUR'000	2014 Net profit	2013 Net profit
10% appreciation of USD against EUR	(4)	(51)
10% depreciation of USD against EUR	4	51

As at 31 December 2014 and 31 December 2013 LTL is pledged to EUR.

37 MATURITY ANALYSIS OF ASSETS AND LIABILITIES

The below amounts represent the assets and liabilities grouped by residual maturity.

The Finance Operation Department based on its liquidity management policy manages liquidity risk. All departments whose operations affect the liquidity of the Group and Bank are involved in liquidity management. The structure of assets/liabilities and the difference between them are calculated in order to carry out liquidity control. Liquidity is largely managed by using monetary instruments.

The maturity analysis of the Bank's assets and liabilities as of 31 December 2014 was as follows:

Group

31 December 2014	Up to 1 month including EUR'000	1 to 3 months EUR'000	3 to 6 months EUR'000	6 to 12 months EUR'000	Over 1 year EUR'000	Over 5 years or not determined EUR'000	Total EUR'000

37 MATURITY ANALYSIS OF ASSETS AND LIABILITIES (CONTINUED)

Analysis of financial liabilities' contractual undiscounted cash flows.

The table below presents the cash flows payable by the Bank under both non-derivative and derivative financial liabilities by remaining contractual maturities as at 31 December 2014 and 2013.

The amounts disclosed in the table are the contractual undiscounted cash flows in comparison with carrying amounts of financial liabilities, comprising discounted cash flows as at the reporting date.

The Group analysis of financial liabilities' contractual undiscounted cash flows has not been presented as the differences to the Bank analysis are insignificant.

38 CAPITAL ADEQUACY

The Financial and Capital Market Commission sets and monitors capital requirements for the Bank and the Group.

The Bank and the Group defines as capital those items defined by statutory regulation as capital. Under the current capital requirements set by the Financial and Capital Market Commission, banks must maintain a ratio of capital to risk weighted assets ("statutory capital ratio") above the prescribed minimum level. As at 31 December 2014, the individual minimum level is set at 11.6% (31 December 2013: 10.8%). The Bank and the Group was in compliance with the FCMC determined individual capital ratio during the year ended 31 December 2014 and 2013.

The Bank's risk based capital adequacy ratio as at 31 December 2014 was 15.3% (31 December 2013: 14.3%).

The Group's capital adequacy ratio does not differ significantly from Bank's capital adequacy ratio, as such it is not disclosed separately.

The following table shows the composition of the Banks's capital position as at 31 December 2014:

	31 Dec 2014 EUR'000	31 Dec 2013 EUR'000
Tier 1 capital		
Share capital	15,651	15,660
Share premium on share issue	260	260
Reserves	4,155	149
Retained earnings	4,546	2,907
Profit/ (loss) for the reporting period	(299)	1,639
Revaluation reserve of available-for-sale other financial assets	(50)	-
Total tier 1 capital	**24,263**	**20,615**
Tier 2 capital		
Subordinated debt (unamortised portion)	4,457	5,709
Total tier 2 capital	**4,457**	**5,709**
Deductions from Tier 1 and Tier 2 capital prescribed by legislation	**(2,010)**	**(1,636)**
Total capital	**26,710**	**24,688**
Capital requirements		
Risk weighted value of exposures to credit risk, counterparty credit risk, impairment of recoverable amounts and unpaid deliveries risk	155,597	158,168
Total exposure to position risk, foreign currency risk and commodity risk	525	304
Total exposure to operational risk	17,517	14,335
Total risk exposure	**173,639**	**172,807**
Capital adequacy ratio	**15.3%**	**14.3%**
Minimal capital adequacy ratio set by FCMC	**11.6%**	**10.8%**

The risk-weighted assets are measured by means of a hierarchy of risk weights classified according to the nature of – and reflecting an estimate of credit, market and other risks associated with – each asset and counterparty, taking into account any eligible collateral or guarantees. A similar treatment is adopted for off-balance sheet exposure, with some adjustments to reflect the more contingent nature of the potential losses.

The Bank and the Group is subject to minimum capital adequacy requirements calculated in accordance with the Basel Accord established by covenants under liabilities incurred by the Bank and the Group. The Bank and the Group has complied with all externally imposed capital requirements during the years ended 31 December 2014 and 31 December 2013.

39 MAXIMUM CREDIT RISK EXPOSURE

The table below shows the maximum credit risk for the components of the statement of the financial position, including derivatives. Credit risk exposure is disclosed based on subjected to credit risk net carrying amount of statement of financial position items less doubtful loans and receivables.

The maximum credit exposures are shown gross, i.e. without taking into account any pledges and collaterals. Detailed information on the type and amount of collateral is presented in the respective notes.

The maximum credit risk exposure for the Group is not disclosed as it does not differ significantly from that of the Bank.

	Maximum credit exposure EUR'000	
	2014	**2013**
Balances with the Bank of Latvia	495	49,176
Demand deposits with credit institutions	84,653	114,003
Held-to-maturity investments	17,860	41,942
Investments classified as available for sale	15,857	-
Loans and term deposits due from credit institutions	2,090	4,922
Loans and receivables	118,469	122,809
Held-for-trading financial assets:	3	21
Other financial assets	4,427	2,455
Total items of the statement of financial position subjected to credit risk	**243,854**	**335,328**
Loans and credit line liabilities	2,841	4,791
Guarantees and letters of credit	2,370	5,688
Forecasted and contingent liabilities	**5,211**	**10,479**
Maximum credit risk in total	**249,065**	**345,807**

As it is shown above, 48% from total gross maximum credit risk amount refers to loans and receivables (2013: 35%).

40 FAIR VALUE OF FINANCIAL INSTRUMENTS

(a) Financial instruments measured at fair value

The table below analyses the financial instruments of the Group and the Bank measured at fair value at the end of the reporting period, by the level in the fair value hierarchy into which the fair value measurement is categorised.

2014	**Level 1: EUR'000**	**Level 2: EUR'000**	**Level 3: EUR'000**	**Total EUR'000**
Investments classified as available for sale	15,857	-	-	15,857
Held-for-trading financial assets	3	-	-	3
Total	**15,860**	-	-	**15,860**
2013				
Financial assets				
Held-for-trading financial assets	21	-	-	21
Total	**21**	-	-	**21**

(b) Financial instruments not measured at fair value

The table below analyses the fair values of the financial instruments of the Bank other than measured at fair value by the level in the fair value hierarchy into which each fair value measurement is categorised. The fair values of the financial instruments of the Group other than measured at fair value are not disclosed as they do not differ significantly from those of the Bank.

31 December 2014	Level 1: EUR'000	Level 2: EUR'000	Level 3: EUR'000	Total fair value EUR'000	Total carrying amount EUR'000
Financial assets					
Cash and due from central banks	-	5,344	-	5,344	5,344
Loans and advances due from financial institutions	-	84,653	-	84,653	84,653
Loans to customers	-	-	120,559	120,559	120,559
Held to maturity financial instruments	17,587	-	-	17,587	17,860
Other financial assets	-	-	4,427	4,427	4,427
Financial liabilities					
Deposits and balances due to financial institutions	-	2,897	-	2,897	2,897
Deposits and balances due to customers	-	-	211,276	211,276	211,276
Other loans	-	-	6,639	6,639	6,639
Other liabilities	-	-	4,585	4,585	4,585
31 December 2013					
Financial assets					
Cash and due from central banks	-	52,443	-	52,443	52,443
Loans and advances due from financial institutions	-	114,003	-	114,003	114,003
Loans to customers	-	127,731	-	127,731	127,731
Held to maturity financial instruments	42,229	-	-	42,229	41,942
Other financial assets	-	2,455	-	2,455	2,455
Financial liabilities					
Deposits and balances due to financial institutions	-	40	-	40	40
Deposits	-	291,858	-	291,858	291,858
Other loans	-	6,639	-	6,639	6,639
Other financial liabilities	-	20,482	-	20,482	20,482

During the reporting year, due to changes in market conditions for certain financial instruments not measure at fair value, inputs became less reliable, and some unobservable inputs have appeared; thus management had to apply judgment on how to interpret the inputs received. However, there was sufficient information available to measure fair values of financial instruments, based on received inputs these financial instruments were transferred from Level 2 to Level 3 in the fair value hierarchy

41 LITIGATION

In the ordinary course of business the Group and Bank are subject to legal actions and complaints. Management believes that the ultimate liability, if any, arising from such actions or complaints, will not have a material adverse effect on the financial conditions of the results of future operations of the Group or the Bank.

42 SUBSEQUENT EVENTS

On 1 January 2015 the Republic of Lithuania joined the euro-zone and the Lithuanian Lit was replaced by the euro.

As a result, the Lithuanian branch of Meridian Trade Bank AS converted its financial accounting to euros as from 1 January 2015 and the financial statements for subsequent years will be prepared and presented in euros.
Comparative information of the previous reporting periods was translated into euros using the official exchange rate of LTL 3.45280 to EUR 1.
No other significant subsequent events have occurred in the period from the year-end to the date of these financial statements that would are not disclosed in these financial statements, but require adjustments to be made to these financial statements and disclosures added to the notes thereto.
